

Installment payments are now possible with the "family trust" procedure

The number of "family trusts" that entrust the disposal and management of elderly people's property to their families has increased in recent years.

Asia Bank Holdings Co., Ltd. (President: Hiroshi Inoue Headquarters: Minato-ku, Tokyo) is created by judicial scriveners, administrative scriveners, etc. in the procedure of "family trust" that entrusts the disposal and management of the property of the elderly to the family. We have started to pay the expenses for creating a notarial act and administrative expenses in installments. (Installment payment service provider: Yamato Credit Finance Co., Ltd.)

According to the Nihon Keizai Shimbun, the number of notarial acts for "family trusts" was 2,223 in 2018. However, a survey by the Japan Federation of Public Officials found out.

Family trusts have been on the rise in recent years due to the greater degree of freedom in property management than wills and adult guardianship.

According to the statistical survey of the federation, the comparison between January-June 2018 and January-June 2019 is a 22% increase from the previous year.

Asia Bank Holdings Co., Ltd. anticipates that this increasing trend of family trusts will become more prominent due to the aging population and nuclear families, and wants to make family trusts easier for more families to use. We think.

In order to spread the family trust system to the world, we heard from judicial scriveners and administrative scriveners who hold seminars and individual briefings, saying, "It will be too late after I have dementia, so I would like to start a family trust immediately. I found that many people are worried that they cannot afford to pay the expenses in a lump sum right now."

For the safety and security of family asset management, we have introduced an installment payment service for the expenses required for family trust procedures in order to further popularize family trusts.

Asia Bank Holdings Co., Ltd. has signed dealership contracts with lawyers, judicial scriveners, and

administrative scriveners who are motivated to spread family trusts to the world, and more people can use family trusts. I hope.
